# Meeting 07-21-2015

## Table of Contents

1. Participants: .....	1
2. For this week: .....	1

### 1. Participants:

Jean-Noel, Danaelle, François, Juan

### 2. For this week:

1. ITK tutorials: Start a git repository for ITK filters where you will implement a filter.  
Read the documentation online ITK software guide.
2. To checkout your outputs generated by your algorithms use *ImageViewer* → This tool is already installed in the system.
3. Important subjects to understand in c++.
  - a. Templates.
  - b. Inheritance.
4. Implement an ImageDilate filter using templates and inheritance.
5. Data repository: <http://slicer.kitware.com/midas3/user/90> You can use this data to produce the filter examples.
